PROFESSIONAL EXPERIENCE

Web & Mobile Developer - Teacher

Le Reacteur - October 2019 to today

Main tasks :

- courses in the following languages : JS / HTML / CSS / React / React Native
- assistance to students by giving them good problem solving practices
- assistance for the achievement of MVP (projects developed for startups) by following an *Agile & Scrum* method
- development of full-stack web or mobile projects, from mockups to code, in collaboration (Git)

School teacher

Seine-Saint-Denis - 2011 to 2019

The skills that I have been able to develop thanks to this profession :

- the organization and prioritization of tasks
- the sense of responsibilities
- autonomy
- the ability to update my knowledge
- team work

MY JOURNEY

After 8 years as a school teacher, I decided to retrain in Web & Mobile development by following Le Reacteur bootcamp. I was then recruited there as a web developer and teacher. Since then, I have continued to train myself on new concepts or new technologies, and I carry out personal projects in which I put my skills into place.

Today I want to devote myself entirely to programming because that is what fascinates and challenges me on a daily basis. I am therefore looking for a position that would allow me to put my skills into practice on new projects.

MY PROJECTS

You will find my personal projects on my GitHub profile or in my portfolio :
